DISCOVERY

I perused the following websites to gain information on the topic of Microinteractions

On two websites I found information that I really liked. On Tubik studios I found gif's that I decided I really wanted to incorporate in my website and thought I would use a modal gallery. The book Microinteractions by Dan Saffer and his website had some great information and a diagram that I wanted to use and incorporate cards or reveals.
I looked at all the sites and gained a lot of information and also decided to use the best practices suggestions from several of the wesites listed into an accordion.

TOPIC PAGE- MICROINTERACTIONS

My topic page is going to cover the use of Microinteractions.
I chose to do this topic on microinteractions because I find them very interesting from a design and usage standpoint. Microinteractions make an action on a web page a more personal and interactive experience. It keeps users coming back because we all enjoy a fun experience. We like to be acknowledged and rewarded for our actions and the best microinteractions do just that.

The page will be broken down into essentially four parts:

1. About Microinteractions
2. Structure of a Microinteraction
3. Best Practices for Use of Microinteractions
4. Examples of Microinteractions

Prefacing this will a home page hero image and the title MICROINTERACTIONS

On the About page I will have two 50/50 text blocks answering two questions:

1. What are microinteractions?
2. Why use nicrointeractions?

On the next section I will show the structure of a microinteration and describe the four parts:

1. Trigger
2. Rules
3. Feedback
4. Loops & Modes

This will be represented by four ‘cards’ that reveal on hover the description of each step.

On the the section listing the Best Practices for Microinteraction use I will use two side by side accordions of four each to give a description of each:

1. Response Time
2. Repetition
3. Simplicity
4. Relatable
5. Easy to Use
6. Animation
7. Balance
8. Evolution

On the last section, showing Examples, a five across by 4 down grid will have thumbnails of twenty different GIF’s showcasing various microinteractions. These will activate a modal gallery of the actual GIF’s in action.

I referenced numerous web sites, the book Microinteractions by Dan Saffer and utilized GIF images from uxplanet.org and tubikstudio.com.
