Nonprofit Web Design Tips

22 tips on how to make an attractive and engaging website for a nonprofit organization. I am going to choose the top 7 that separate a nonprofit from any other website.

Those tips are:
Feature the most relevant information
Provide multiple ways to get to key content
Make the cause clear
Update your website every 2-4 years
Prominently display your donation button
Feature multiple calls to action
Highlight organizational events

I want to use an example nonprofit organization's webpage with their logo. I will also show the image of the webpage along with a link to the website. I will also provide a link to the neon website for all of the 22 tips that they have. I will just feature 7 of those tips because there is so much information for one page.

The nonprofit organization I will show an example of is Habitat for Humanity. Their website is simple and it shows who they are and what they do.
