**PORTFOLIO PLANNING**

I decided to do a personal portfolio instead of a website, because I need a portfolio, and it's killing two birds with one coding stone. I decided that the portfolio needed three sections: an introduction, a "skills" section, and a section to show portfolio work. I found a template that I wanted to use that covered the portfolio section really well, and I'm going to see what I can do from there!

WHAT TO INCLUDE
- Infographic (skills)
- Opening blurb
- Contact page
- Portfolio section

COLOR SCHEME

I need a color scheme that's really about me: blues, greens, blacks. Something that reflects the kind of work that I do.

```
                        ┌──────────────────────┐
                        │                      │
                        │    name/opening      │
          ┌─────────────┤     statement        ├──────────────┐
          │             │        h1            │              │
          │             │                      │              │
          │             └──────────┬───────────┘              │
          │                        │                          │
          ▼                        ▼                          ▼
  ┌───────────────┐      ┌───────────────┐          ┌───────────────┐
  │               │      │               │          │               │
  │  skills/intro │      │   portfolio   │          │    contact     │
  │      h2       │      │     intro     │          │      h2        │
  │               │      │      h2       │          │               │
  └───────────────┘      └───────┬───────┘          └───────────────┘
                                 │
                                 ▼
                         ┌───────────────┐
                         │               │
                         │   portfolio   │
                         │  subsection   │
                         │      h3       │
                         │               │
                         └───────────────┘
```
