

Host Page

Introduction

This assignment is to create a host page that links to class projects. You need to include a wireframe along with a style tile. Also this page should include your name and MACA 2880. It must be responsive and have quality to a professional level content strategy and design. The build can be your choice and you need to include two on your own css3 micro-ux animations. Having a host page is important, it is NOT a portfolio page. A host page is hosting anything you want and in this case it is hosting assignments from this semester. The template that I picked is a great one with great animations built in. For my on my own animations I created a 3D text hover when you click on the menu in the right top corner you see that there is text options to go to those sections. Also I animated the Host Documents button.

Host Page

- Kelsey Kaminski
 - MACA 2880 Host Page
 - Host Documents
 - Web Wiki
 - Wordpress
 - Topic Project
 - Documents
 - Exercise 3: Video Player
 - Exercise 5: CSS3 Animations
 - Portfolio
 - What I learned
