

WEB DESIGN COMPONENTS

These are the most basic units a website is comprised of. They are the building blocks of any web page. Understanding these components will allow you to exploit them in your own designs. So let's get into it!

LINE

A line is a path of a dot or point through space and always has more length than thickness.

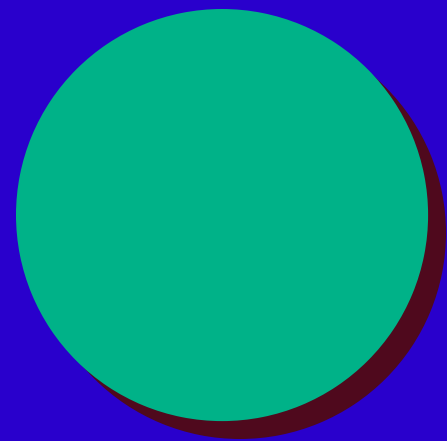

SHAPE

A two dimensional area confined by an actual or implied line connected at the ends. They can be abstract or geometric.

SPACE

Space refers to the area within, around, above or below an object or objects. It is important to creating and understanding both two dimensional or three dimensional works of art.

COLOR

The property possessed by an object of producing different sensations on the eye as a result of the way the object reflects or emits light.

TYPE

Type is lettering fixed into a font, allowing them to be set mechanically or on the computer. There are hundreds of thousands of typefaces available, catering to all types of tastes.
