

Planning Statement for Web 3 Hostpage Morgan Lashbrook

Elements in this page will be my logo and images of web projects. The projects will be displayed via a grid of hoverable visual tiles under a hero image with a logo on top. The dominant elements will be square shaped tiles on the page containing web projects. The template I am using is called Directive from html5up. I like that this template highlights the contents being displayed on the page. However, I want to change the original tile layout of this page to a grid system that will shuffle to a stacked single column on mobile. The navigation structure is a grid system placed inside a centered div. The navigation will be made more interesting with unique css caption hover overlays. The color and text tone are taken from elements of my personal branding (plum, teal, gray, black, modern and clean.) Additionally, a challenge that will need to be addressed is how to make the grid system break apart and become singular on mobile applications. Another task I plan to accomplish is finding an alternative solution for hovers on the mobile application. Finally, the template contains a contact form that I would like to tweak for later use when I move the website over to my own hosting platform.
