

# PC vs Console

## WHO TAKES THE CAKE?

### FREE ONLINE

All you need to play online is to pay for the internet connection.

### FLEXIBLE PRICING

Some PCs can reach multiple thousands of dollars. While others can cost you less than \$500.

### UPGRADES AVAILABLE

A game's beauty is only limited by your wallet.

### 62% OF PLAYERS

1.2 billion gamers play on a PC out of the 1.8 billion worldwide.

### PROS AND CONS

Pros:

- Upgrade anything
- Variety of controller options
- Use TV or a Monitor.

Cons:

- Can be pricey
- Not as convenient
- More Hardcore

### PAID SUBSCRIPTION

In addition to paying for internet, you also have to sign up for a subscription you pay every month/year.

### SET PRICE

If you want a console, you have to fork over \$250 - \$500. Which is cheaper than paying for expensive PC parts.

### STOCK ONLY

What you see is what you get, and there is nothing you can do about it.

### 56% OF PLAYERS

Less than the PC, consoles amass a still staggering 600 million players.

### PROS AND CONS

Pros:

- Less expensive
- More laidback
- Can be mobile

Cons:

- Hog a TV
- Must use controller
- Games don't look as good
