LOCAL JOB

Web Designer, Reverie

https://www.glassdoor.com/job-listing/web-designer-reverie-JV_IC1134627_KO0,12_KE13,20.htm?jl=2731117820&ctt=1525225654510

Description:

You will be responsible for bringing your own creativity and innovation to design awesome new web pages for our companies' websites. You will be collaborating with the design and development teams to create engaging web experiences for our users. You must have strong attention to detail and desire for quality and must be able to match the Reverie brand style and build upon it. Special expertise and experience in web design is a must. You will be focused primarily on web design with some web development capabilities and experience expected. Your focus will include, but not be limited to, creating digital designs for web pages and e-mails. A strong portfolio and/or solid history of past work is a must in this role. Traditional graphic design also a plus.

Yes! I think this would be a really interesting job. Working with the development team to create designs for web, and email campaigns. They have a clear message and focus which will make designing a bit easier! I do have a strong attention to detail, and the ability to match branding and style. I am passionate about typography, style, and color!

I do have most of the qualifications they are looking for. I do not have a bachelor degree, or digital agency experience. But I do have many of the other skills they are looking for. Being able to design layouts for mobile and web, eye for detail, typography, and color. I do have a knowledge for CSS3 and HTML concepts and design trends.

PART TWO: AGENCY

A. <https://vitamintalent.com/talent/jobs/130199>

B. I think the main difference is that is a temporary job, that could turn into a full time job. Temp to hire job. They have all the same job duties, and qualifications. But it doesn't say that they are definitely going to hire you. "Vitamin T is recruiting for a UX Designer with Web Development skills to fill a full-time, temp-to-hire position with a non-profit in the metro Detroit area. This position will be working in the Marketing & Communications Department in a fast paced environment."

PART THREE: DREAM JOB

My dream job would be working with an artist, band, venue, or record agency. I would love to be able to design for their media, posters. I would also love to work on designing the bands web page, or even the record pages sites. I think it would also be really fun to help them engage on social media! I think the official title would be Web Designer.

My responsibilities would be to work with the artists on their brand and message, and then translate that into design. I could do anything from create their logo, or posters announcing tour dates. I love scrolling through social media and seeing the new posts about upcoming shows. I think this would be a really fun career!

Skills: Graphic Design, Web Design, Branding, Adobe Suite, Social Media, Microsoft, User Analysis, Persona, Development.
