Discovery Statement

What elements will be included?

- Website purpose statement
- Course Identity: MCC logo, MACA2880
- Your Identity: Drawing of me
- Statement: Your point of view as a web designer. What interests you. What are your strengths. What you think it means to be a web designer.

What will be the dominant element(s)? The grid and the clean elements

Is there a template or layout that you are interested in using?

https://colorlib.com/wp/template/halo/

What do you like about the template?
I originally wanted it to scroll to the right altogether like the www.yangrutherford.com site, that was too difficult to find, so I opted for a cleaner, more modern looking template that offers a really cool gallery aspect and rollover for the portfolio project.

What do you want to change about the structure / layout of the template?
The aesthetics for sure. It will look completely different. Different colors and I likely will only have two links on my nav bar, IF I'll even have a nav bar at all. I haven't decided what information I want on my nav bar.

What is included with the template?
The html file, CSS folder, Fonts folder, Img folder and JS folder.

What is the structure of the Navigation? There might not be a nav. It may just be the opening section and a portfolio grid that links to the project.

How will I make the navigation interesting? That there will only be TWO sections. Maybe. Just home and portfolio, if anything. Simple and Clean.

Do I want the projects to link back to the portal page? Not necessarily.

How will I indicate a hover? When rolling over text, the mouse will change to a hand. When rolling over the gallery, the images will be covered by a screen with a description of the project in white text over it.

How will I indicate which item is selected? See above. When clicking on the project, it will link to that project.

Which CSS animations am I interested in using? The animations for the nav and gallery.

- **Are there CSS animations already in the template I chose?** Yes, the hover animations for the buttons and also, for the gallery.
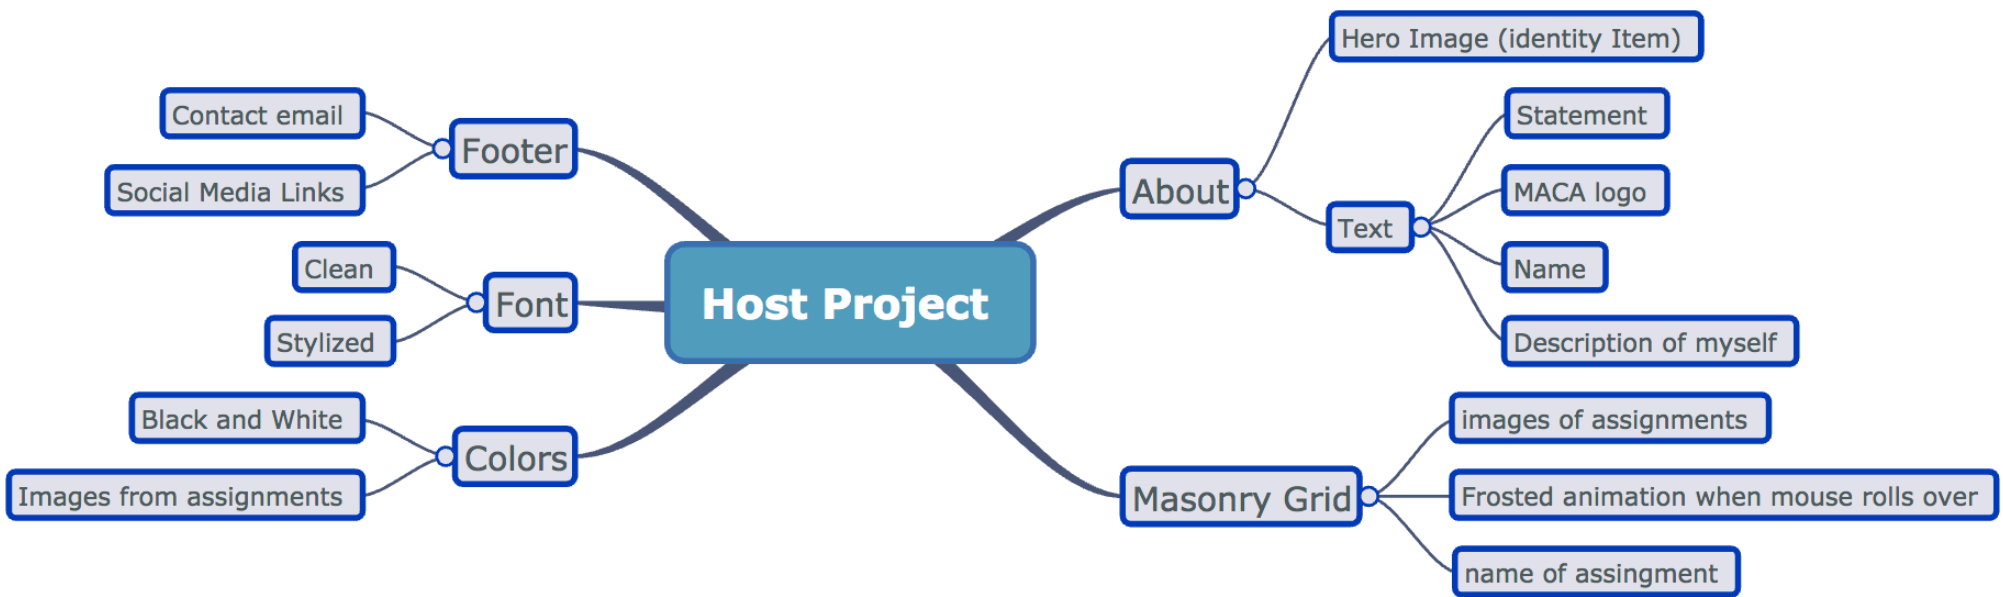

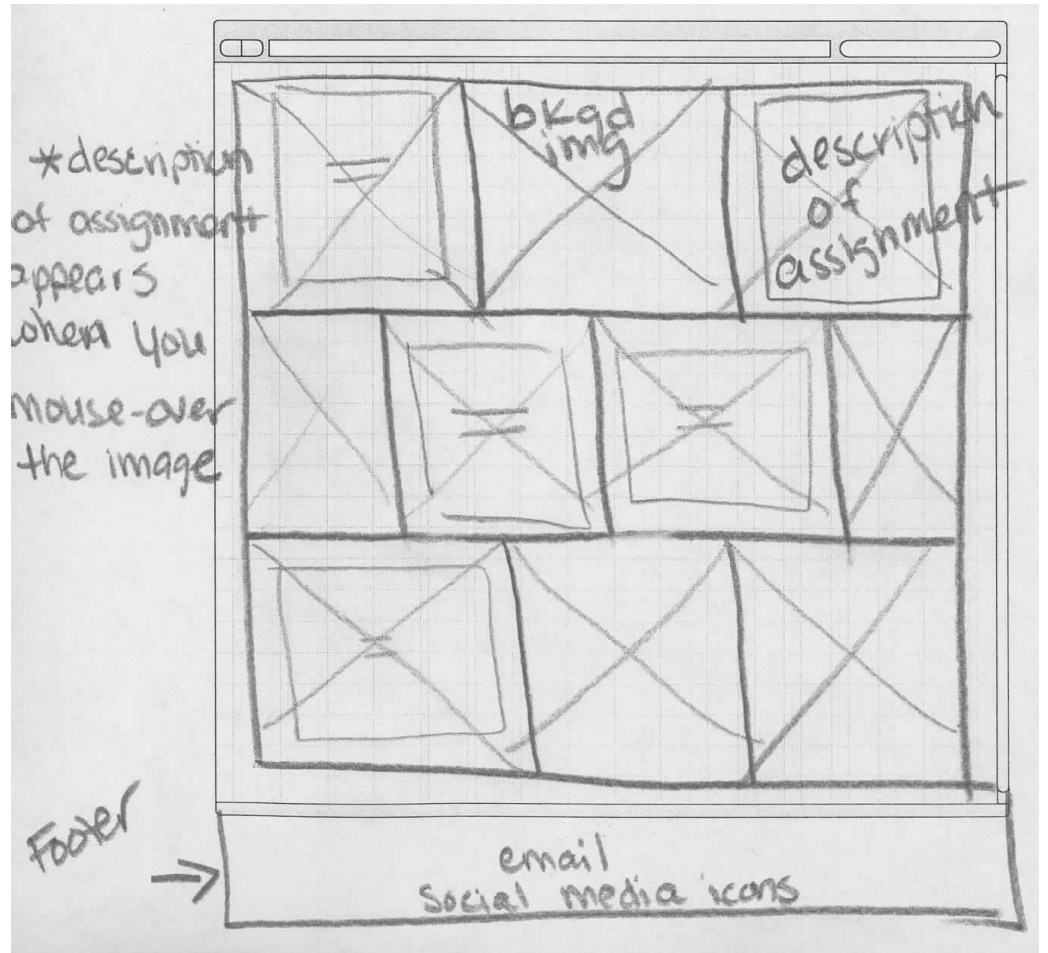

Style

- **Do I have a color / texture theme in mind?** Yes, clean and modern.
- **Am I ready to pick a color palette?** Maybe?

 Add two items of your own to discuss with yourself here.

The way that the nav bar scrolls to the project.

The way that the gallery links to the projects. Particularly the interesting overlay.
