Jenna Zalenski

HOST – Discovery Statement

The elements included in my host page will be my personal logo, Macomb logo, website topic and my personal statement. Then followed will be all the projects linked showing the projects I did in design for the Web 3.

My template is super clean and to the point. It displays them in a subtle way has a slight color change when you hover over it. There is a total of eight boxes that will have titles of the projects. I want the boxes to really stand out with the colors I picked from my style tile.

The navigation on my host is super simple and easy to use. The host will be mostly white with accent colors that put emphasis on the projects.

My template is responsive and looks amazing on all different platforms. It collapses very nicely and keeps every proportional. On mobile devices my project boxes shrink down into a single column and stack nice.
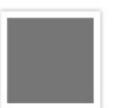

I love the template because it has a lot of negative space. I Will be using a nice blue and purple for my tiles to bring a pop of color to the page. The projects are the key of the page so I want to put emphasis on those.
